

# PennyWise Release Notes

**Release Notes for v2.1.0**

**Date: November 4, 2024**

## Summary

We're thrilled to introduce new features in this release, including language support, real-time stock updates, and offline functionality. These additions make the app more accessible, powerful, and user-friendly.

## New Features:

- **Language Options:** Users can now choose between Zulu and Afrikaans, enhancing accessibility and user experience for a wider audience.
- **Push Notifications:** Stay informed with real-time notifications about your portfolio, stock prices, and more.
- **Biometric Authentication:** Secure your account with fingerprint authentication for a faster, more secure login experience.
- **Offline Mode with Sync:** Access your data even without an internet connection. Any changes made offline will automatically sync when you reconnect.

## Innovative Features

- **Real-Time Stock Exchange View:** Get live stock prices and monitor market trends in real time for informed decision-making.
- **Portfolio Trading (Demo):** Try out stock trading in a simulated environment, allowing you to buy and sell stocks and track your portfolio without real financial risk.

## Bug fixes:

- **Fixed:** When clicked on the transaction details the app would crash the bug was fixed and users can now view transaction details
